Our ceiling systems offer individually adjusted contamination control for all cleanroom classes. They are modularly expandable and can easily be fitted with lights and filters. Ceiling panels are available in single or double shell design, in standard grids of 600 × 1200 mm and 1200 × 1200 mm – on request, grids starting at 150 mm × 150 mm are also possible. All ceiling systems comply with the EN ISO 14644-4 cleanroom standard and are certified by the Fraunhofer institute.

Light ceilings:

- modularly constructed grid ceiling
- light weight, quick and easy assembly

Ceilings with 100 kg/m² single load:

- modularly constructed grid ceiling
- can be walked on for maintenance work
- machinery can be mounted to the ceiling and above the cleanroom

Ceilings with 200 kg/m² single/point load:

- modularly constructed cassette ceilings
- can be walked on for maintenance work
- heavy machinery can be mounted to the ceiling and above the cleanroom

Technical data

- extrusion depth 58 mm, extrusion height 40 mm
- grid sizes 600 × 1200 or 1200 × 1200 mm
- other grid sizes from 150 × 150 mm possible
- anodized aluminium ceiling extrusions
- different ceiling panels, single or double
